

Comfort Garden

Reconnect

It is ideal for high-end gardens that seek the highest level of natural appearance. Our Look&Feel technology gives this model an exceptional sense of realism, achieved by combining three fibre heights and seven yarn colours. In addition, SoftMax technology provides an outstanding level of softness underfoot.

The range of multidirectional fibres is divided into three types: straight fibres at 100% of the pile height, semi-texturised KDK fibres at 90%, mimicking the natural growth of grass blades, and texturised fibres at 70%, in a green/beige bicolour, replicating the root effect of natural grass.

It incorporates the Everback backing, made from 100% PE polyolefins, which enables a more efficient recycling process at the end of the product's life cycle.
