

Prado

Garden

It is our 50 mm high grass that stands out for its good quality/price ratio. It maintains an incredibly natural and realistic look thanks to the Look&Feel technology combining different types of colours, height and width in its fibres. It incorporates BodyShape technology with various fibre shapes that give the product a superior recovery.

In addition, Prado artificial grass is the product with the highest drainage capacity of its range thanks to the MaxDrain technology. In this way we achieve a total naturalness of the product.
