

Provenza

Garden

Provenza is a 40 mm high artificial grass that stands out for its multidirectional fibre, achieving a natural and uniform finish across the entire surface.

Its structure combines straight, semi-textured fibres with KDK technology and textured fibres, distributed at different heights and with more than four colour shades, which provides volume, realism and excellent recovery after footfall. It also has great drainage capacity.

The result is a comfortable, stable and visually rich surface, ideal for gardens and outdoor spaces that seek naturalness, body and good performance in daily use, with easy maintenance.
